Profile

I have been working at Ricoh Co., Ltd. as a software engineer for 4 years. Currently I'm working as a team leader. I love all of Web technologies :) Now I develop a Web browser as a self project for understanding.

Work Experience

Ricoh Co., Ltd. April 2016 -

- April 2018 -
 - **Working as a team leader** on a project that I **proposed** April 2018.
 - Architected the Web services and developed them with Google Cloud Platform in **React.js** and **Node.js (TypeScript)**.
 - Promoted the services then **5,000 people out of 8,000 (all in near future)** at Ricoh used the services and sold it for 3 customers.
- Nov. 2017 - April 2018
 - Joined **Google & Ricoh's internal business competition** (make plan and prototype service) and got a **grand prize out of 20 teams**.
- April 2016 - Oct. 2017
 - Reduced observation system cost 90% for video conference service to by migrating to serverless architecture in **Node.js (TypeScript)**.
 - Reduced 20% of cost for notification service to customers by developing automatic notification system in **Node.js (TypeScript)**

Pixiv Inc. (Intern) August 2010

- Developed a new Web service with **HTML, Flash, PHP, Apache, MySQL** and Twitter.

Education

- **Information Science (Engineering)**
April 2015 - March 2016

Nara Institute of Science and Technology

- **Electronics and Information Engineering**
April 2014 - March 2015

National Institute of Technology (KOSEN),
Nara College

Technical Skills

Leadership and Achievement
